

1 This listing of claims will replace all prior versions, and listings, of claims
2 in the application.

3
4 **Listing of Claims:**

5
6 Claim 1 (Currently amended): A method performed at a thin client
7 comprising:

8 establishing a session with a server computer;
9 receiving a set of instructions and data directed to providing graphics
10 testing from the server computer, based on performing a test tool resident at the
11 server computer, wherein the test tool is exclusively executed at the server
12 computer;
13 creating a virtual channel to the server computer; and
14 transferring graphics testing information through the virtual channel.

15
16 Claim 2 (Original): The method of claim 1 wherein the establishing
17 comprises receiving a request from the server computer.

18
19 Claim 3 (Original): The method of claim 1 wherein the establishing
20 comprises receiving a request to the server computer to establish the session.

21
22 Claim 4 (Previously presented): The method of claim 1 wherein the
23 receiving the set of instructions and data comprises receiving a dynamic link
24 library for use by the test tool to perform graphics testing.

1 Claim 5 (Previously presented): The method of claim 4 wherein the test
2 tool is a series of tests that are part of a test application program.

3
4 Claim 6 (Original): The method of claim 1 wherein the creating comprises
5 forming the virtual channel through a wide area network.

6
7 Claim 7 (Original): The method of claim 1 wherein the creating comprises
8 forming the virtual channel through the Internet.

9
10 Claim 8 (Original): The method of claim 1 wherein the creating the virtual
11 channel comprises registering a unique virtual channel identifier with the server
12 computer.

13
14 Claim 9 (Original): The method of claim 1 wherein:
15 the transferring graphics testing information comprises executing individual
16 tests in a list of tests prior to succeeding tests in the list of tests; and further
17 comprising timing each of the tests and storing times of each of the tests.

18
19 Claim 10 (Original): The method of claim 1 further comprising
20 timing the establishing the session.

21
22 Claim 11 (Original): The method of claim 1 further comprising
23 logging off the session with the server computer and timing the logging off.

1 Claim 12 (Original): A personal computer configured to perform the
2 method of claim 1.

3
4 Claim 13 (Currently amended): A method performed by a server
5 computer comprising:

6 establishing a session with a remote thin client computer;
7 storing a set of instructions and data directed to graphics testing applicable
8 to the remote thin client computer in a registry, wherein the graphics testing is
9 exclusively performed by a resident test tool at the server computer;
10 sending the set of instructions and data directed to graphics testing to the
11 remote thin client computer; and
12 creating a virtual channel with the remote thin client computer through
13 which information related to the graphics testing is transferred.

14
15 Claim 14 (Currently amended): The method of claim 13 wherein the
16 establishing comprises receiving a request from the remote thin client computer.

17
18 Claim 15 (Currently amended): The method of claim 13 wherein the
19 establishing comprises sending a request to the remote thin client computer.

20
21 Claim 16 (Previously presented): The method of claim 13 wherein the
22 storing the set of instructions and data comprises loading a dynamic link library
23 which is used by the resident test tool to send the information.

1 Claim 17 (Previously presented): The method of claim 16 wherein the
2 resident test tool is series of tests that are part of a resident test application
3 program.

4
5 Claim 18 (Original): The method of claim 17 further comprising
6 timing each of the tests.

7
8 Claim 19 (Original): The method of claim 13 wherein the creating
9 comprises forming the virtual channel through a wide area network.

10
11 Claim 20 (Original): The method of claim 13 wherein the creating
12 comprises forming the virtual channel through the Internet.

13
14 Claim 21 (Original): The method of claim 13 further comprising
15 timing how long information related to graphics testing is sent to the remote client
16 computer.

17
18 Claim 22 (Original): The method of claim 13 further comprising
19 timing the establishing the session.

20
21 Claim 23 (Original): A server computer configured to perform the
22 method of claim 13.

1 Claim 24 (Currently amended): A thin client computer comprising:
2 means for performing graphics tests from a remote test tool resident and
3 exclusively executed on a server computer;
4 means for facilitating receipt of the graphics tests on the thin client
5 computer by the remote test tool; and
6 means for timing the graphics tests as received from the server computer.
7

8 Claim 25 (Original): The computer of claim 24 wherein the
9 instructions and data comprise a dynamic link library.
10

11 Claim 26 (Original): The computer of claim 24 wherein the means
12 for facilitating transmission of graphics testing information comprises establishing
13 a virtual channel is through a wide area network.
14

15 Claim 27 (Original): The computer of claim 24 wherein the means
16 for facilitating transmission of graphics testing information comprises establishing
17 a virtual channel is through the Internet.
18
19
20
21
22
23
24
25

1 Claim 28 (Current amended): A server computer comprising:
2 means for accessing a remote thin client computer;
3 means for storing instructions and data used by a test tool exclusively
4 performed at the server computer to provide testing to the remote thin client
5 computer;
6 means for identifying particular instructions and data used for the remote
7 thin client computer;
8 means for setting up a virtual channel between the server computer ; and
9 means for timing the tests performed by the test tool through the virtual
10 channel.

11
12 Claim 29 (Original): The server computer of claim 28 wherein the
13 instructions and data comprise a dynamic link library.

14
15 Claim 30 (Original): The server computer of claim 28 wherein the
16 means for setting up the virtual channel is performed over a wide area network.

17
18 Claim 31 (Original): The server computer of claim 28 wherein the
19 means for setting up the virtual channel is performed over the Internet.

1 Claim 32 (Previously presented): A thin client computer comprising:
2 a memory;
3 a processor coupled to the memory; and
4 instructions stored in the memory and executable on the processor to access
5 a test tool exclusively performed on a server computer, and perform testing using
6 the test tool through a communication channel.
7

8 Claim 33 (Original): The computer of claim 32 wherein the test tool
9 relates to graphics testing.
10

11 Claim 34 (Original): The computer of claim 32 wherein the
12 communication channel is a virtual channel.
13

14 Claim 35 (Original): The computer of claim 32 wherein the
15 instructions comprise a dynamic link library.
16

17 Claim 36 (Original): The computer of claim 32 wherein the
18 instructions further time tests as received from the test tool and store times for each
19 of the tests.
20
21
22
23
24
25

1 Claim 37 (Previously presented): A server computer comprising:
2 a memory;
3 processor; and
4 a memory to store instructions executable on the processor to access a
5 remote thin client computer; transmit testing information from a resident test tool
6 through a communication channel; and exclusively perform the resident test tool.
7

8 Claim 38 (Original): The computer of claim 37 wherein the
9 communication channel is a virtual channel.
10

11 Claim 39 (Original): The computer of claim 37 wherein the
12 instructions comprise a dynamic link library.
13

14 Claim 40 (Original): The computer of claim 37 wherein the test tool
15 relates to graphics testing.
16

17 Claim 41 (Previously presented): The computer of claim 37 wherein the
18 instructions further time tests as sent from the test tool and store times of each test.
19
20
21
22
23
24
25

1 Claim 42 (Previously presented): A computer-readable medium having
2 computer-executable instructions for performing steps at a thin client computer
3 comprising:

4 contacting a server computer to send instructions and data used to access a
5 test tool in the server computer;

6 setting up a virtual channel in which testing is exclusively performed by the
7 test tool at the server computer; and

8 determining the beginning and ending of individual tests represented by the
9 testing information.

10
11 Claim 43 (Original): The computer-readable medium of claim 42
12 further wherein the computer-executable instructions for performing steps further
13 comprise timing the testing.

14
15 Claim 44 (Original): The computer-readable medium of claim 43
16 wherein the computer-executable instructions for performing steps further
17 comprise storing times of the individual tests.

1 Claim 45 (Currently amended): A computing device comprising:
2 a processor configured to initiate a session with a remote thin client
3 computing device;
4 a memory module configured to store a dynamic link library in a register,
5 wherein the dynamic link library is directed to send information and perform
6 testing regarding a resident graphics test to a remote computer; and
7 an interface to send the dynamic link library to the remote client computing
8 device through a network.

9
10 Claim 46 (Original): The computing device of claim 45 wherein the
11 network comprises a virtual channel between the computing device and the remote
12 client computing device.

13
14 Claim 47 (Currently amended): A system comprising:
15 one or more remote thin client computers; and
16 a server computer configured to identify software modules performed on
17 the server computer used to provide graphical tests through a communication
18 channel directed to particular remote client computers, wherein the software
19 modules are used to provide the graphical tests.

20
21 Claim 48 (Original): The system of claim 47 wherein the
22 communication channel is a virtual channel.
